

Product Code:
STP
STPW
STPC

Description:

The Standard Test Pack (STP) conforms to EN 285, EN 13060, CFPP 01-01 and HTM 2010 and is designed to enable the Bowie and Dick test to be carried out on large steam sterilisers.

The Standard Test Pack Wrap (STPW) is a useful accessory for the standard test pack. It helps the operator to ensure the sheets are correctly compressed and secure (EN 285 stipulates that the Standard Test Pack be compressed by hand, wrapped in a similar fabric and secured with tape that is no more than 25 mm wide). It is made with the same material as the standard test pack.

Ties and loops remove the need to use autoclave or masking tape to hold the pack together and allow an even compression of the pack. A handle allows the pack to be moved easily when transporting or placing in a sterilization chamber. Eyes are fitted at the top of the wrap to attach the free space temperature thermocouple aerial firmly in the correct position using the 50 mm height guide when performing small load thermometric tests.

The Standard Test Pack Carrier (STPC) provides protection for the Standard Test Pack and Standard Test Pack Wrap when being transported and whilst in storage.

Specification:

MATERIAL	100% bleached cotton
SHEET SIZE	120cm x 90cm
PACK	38 sheets (35 required for test) including a thermocouple positioning sheet.
LAUNDRY	Service available as an extra for sheets to be pre-washed, folded and ready for use.

Datasheet : 043

Validation Accessories:

Pre-cut Validation Thermocouples

Validation Thermocouple Looms

GL45 Bottle Cap Gland for Thermocouple

Thermocouple Entry Gland TCEG

Y Piece Extension

Tee Piece Extension

Clamps, Tri-clover Blanks, Gaskets

Type T thermocouple Wire

Steam Test Kits
