

**Product Code:**  
**VC**

**Description:**

The validation clamp and gasket allows validation thermocouples or small diameter probes to be placed inside a tri-clover joint.

The validation clamp come in three sizes with various ports (1-4 ports) for validation wire and small probes/tubes.

**Specification:**

|                       |                                                                   |
|-----------------------|-------------------------------------------------------------------|
| <b>CLAMP MATERIAL</b> | 316 stainless steel                                               |
| <b>CLAMP SIZE</b>     | 1", 1.5" & 2"                                                     |
| <b>PORTS</b>          | 1, 2, 3 and 4 ports                                               |
| <b>GASKETS</b>        | Platinum cured silicone gaskets to suit<br>Can be sold separately |
| <b>TO FIT</b>         | 1/0.5mm & 7/0.2mm wire                                            |
